

I urge you to reject the NAB's petition 04-160. History has shown that the NAB has no interest in furthering technology or the ability of citizens to enjoy the fruits technology, rather they are only interested in preserving their monopoly on broadcast services. The citizens of the United States, the world's leader in technology, should have every right to enjoy any subscription broadcast services they choose. They should be stifled by the self serving interest of the NAB and their membership.

Regards,

Doug Woodall
